

Laboratory Technician

We are looking for a technician to temporarily support the research of the Chemical Biology of Antibiotics (CBA) laboratory at the Centre of infection and Immunity of Lille, located at the Institut Pasteur of Lille. The Chemical Biology of Antibiotics (CBA) team is an international, cross-disciplinary team focused on the antibiotic drug discovery and development and work in organic chemistry, bacterial genetics, biochemistry, bacteriology and drug susceptibility testing.

The technician position is available as a maternity leave replacement (until end september). Applicants must hold an appropriate degree (DUT or BTS), preferably with a "license professional" and hands on experience. The role of the technician will be to support a number of the research disciplines of the CBA laboratory:

Organic chemistry,
Fermentation and compound purification
Bacterial genetics (cloning conjugation, generating knockout strains)
Protein purification and Biochemistry,
Bacteriology or
Drug susceptibility testing.

Above all, the candidate must be motivated and have a desire be involved in antibiotic research. Candidates must have strong practical experience and be able to work efficiently and dynamically with members of the team.

Starting date: As soon as possible

How to apply: Applicant should send a CV, a cover letter, and references to Ruben Hartkoorn: ruben.hartkoorn@inserm.fr
